#### **DETAILED ACTION**

1. Amendment filed on 09/15/2005 has been entered.

2. Claims 1, 3-9, 11-15,, 17-25, 28-30 are presented for examination.

### Response to Arguments

3. Applicant's arguments to the rejection(s) of claim(s) 1-30 under prior rejection have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Lee (U.S. Patent No. 5,883,846).

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1,3-7,9, 11-15, 17-18,19-25,28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (U.S. Patent No. 5,883,846).

Regarding claims 1, 3-7, 13-15, 17, 18, 20, 28-30, Lee discloses a sense amplifier (Figure 4) for a memory array providing increased reliability in sensing small voltage differences, comprising:

two cross coupled inverters forming a latch (Figure 4, 101,102,104,105); supply coupling means (SAC) for selectively connecting the latch to a supply source;

compensating means (102, 103) for correcting an offset between the inverters of the latch (Column 3, lines 50-55);

bit line coupling means (Figure 4, DATA, DATAB) for selectively connecting inputs of each inverter to complimentary bit lines from the memory array (Column 3, lines 50-55); and

delaying means (Column 3, lines 14-15) for delaying the disconnection of the bit lines from the sense amplifier after the latch has been coupled to a supply source (Column 4, lines 5-7, Column 7, lines 27-30).

More specifically, Lee disclose wherein the supply coupling means comprises an NMOS transistor (Figure 4, 101), and wherein the bit line coupling means comprises a PMOS transistor (Figure 4, 106, 105) connected in series between each complimentary bit line and the latch (Figure 4), and wherein the compensating means comprises a pair of NMOS transistors (Figure 4, 102, 103) connected between the latch and the supply source, the supply coupling means is controlled by an enable signal (Figure 4, SAC), and wherein the delay is introduced between enabling of the supply coupling means and the bit lines (Figure 6D, Column 7, lines 51-60).

Regarding claims 9-12, 21-25,the apparatus discussed above would perform the method in claims 9-12.

### Allowable Subject Matter

6. Claims 8-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8, 19 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Lee (U.S. Patent No. 5,883,846), and others, does not teach the claimed invention having a delaying means comprise a plurality of of inverters connected in series.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thong Q. Le whose telephone number is 571-272-1783. The examiner can normally be reached on 8:00am-5:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zarabian Amir can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
